On a piece of wrapping paper I noticed that the entire design was outlined in red. It gave a different effect that I liked so I made a pattern. The entire design is outlined in yellow red except the outline of the butterfly. The inside lines are red. After the design was penned on and fired, I washed flesh over the entire plate and padded and fired again. Before I fired the second time I wiped the flesh color off the white flowers. I used yellow red, medium blue, yellow brown and yellow brown #2. I put a yellow red border around the outer edge of the plate. *cd*
